

**Here are some information to help you evaluate the size of the rings**

Sizes are expressed in European Ring Sizes. The ideal size will fit comfortably and be tight enough to prevent the ring from accidentally falling off. Before ordering make sure that the ring size is correct. Finger size changes with temperature and time of day. The best time to measure accurately is midday.

Step 1: Get a strip of paper.

Step 2: Wrap it around the base of the appropriate finger.

Step 3: Mark the point on the strip or twist the paper to tighten up the loop, forming a complete circle.

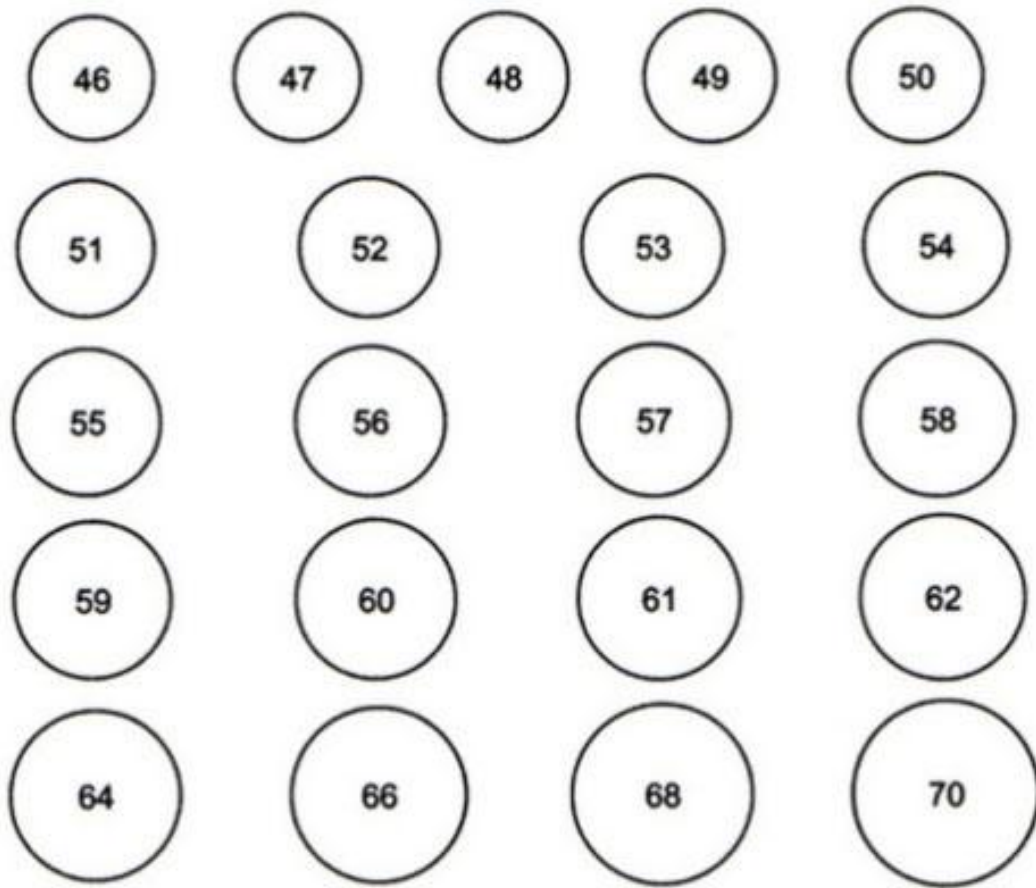

Step 4: Measure the length of the the circle

Step 5: Determine your ring size from the chart below

The other solution is to print this document (check that the 10 cm line on your print is really 10 cm length) then look for the right size by placing your ring on the circles. The European size is the number in the middle of the circle.

SCALE: 10 cm
